There is not much to tell he is consistently professional and wonderful as is the office from the time you walk in. It is rare that I don't get relief when I need it. Dr Stein has relieved pain and more on both sides of my neck and now a few other areas in my back. I just had this yesterday and I'm praying it stays feeling like it does right now because it's the most relief I have found in a very long time. You won't find anyone better

Very professional. Will not do any procedure that is not likely to help. Also, very good hands when doing any injection.

I have been going to Dr Stein for over seven years now and cannot say enough good. First he took care of my neck both sides and I was able to turn my head for the first time in years. My migraines also stopped. He doesn't drag things out he get stuff done. Dr Stein is now helping me with my severe low back and hip pain. Because I have a heart condition he checks and double checks everything about medications I am on. I also love that he doesn't push pain medication but tries to fix what he can. I had gone to a couple of others where I could've easily just taken a pill for the pain but that's only a temporary fix until the next pill. Dr Stein wants you to have quality of life. His staff is amazing as well Deb treat you as if you were family. I had a headache the night of my treatment it was on the list of things to watch for so I called and almost immediately had a call back from Dr Stein. He is not only an amazing doctor but a very kind person.

Great office staff. My appointment was on time. Dr Feldman easily explained all the issues concerning my pain. He also explained the specifics of the epidural procedure and what to expect after it's completion. I left the office feeling confident that my pain would be totally or mostly relieved.

What can I say, Dr Stein is the best pain solution doctor I have ever met. Cordial and articulate, he explained, then diagnosed my problem with a realistic course of action. Went back to get my pain treatment and have been doing extraordinarily well. I have known Dr Stein since 2014 and trust him implicitly with not only what he does, but the referrals he gives for other back related needs. And, I don't want to forget to mention his staff, kind, empathetic, and very helpful in navigating insurance and the whole course of treatment with Dr. Stein.

I was suffering for neck pain, headaches, sweating...all this treatment with patches, solutions... After a visit with DR Schaja , I received a steroide injection on my neck and the same night all my problems disappeared. He is a good communicator, and I feel secure when he is performing the injection. The staff are very friendly and the office clean . I'm his patient from 2019 I recommend him to everyone.

After a year of sciatica due to a pinched nerve and herniated disc and visits to 2 orthopedic surgeons and 1 neurosurgeon, I finally found some relief with Dr. Stein. He is kind, caring and clearly wanted to help me with my pain, which he eventually did. I can't recommend him enough.

Dr. Ian M. Schaja

 Sharon Painter

 Responded

★★★★★ 5.0 /5 Apr 30, 2021

Dr. Schaja was a miracle worker for me. I had developed lower back pain and it was determined after physical therapy and steroid injections that my next step was a nerve ablation. I was not so happy to try that method and asked Dr. Schaja if I had any other options. He stated PRP therapy was an option. It is important to mention, this is not a procedure covered by insurance however, the results totally justified the cost. I had two injections about a month apart and the results (while not immediate) are amazing. I was sure some of my pain was due to gaining weight during the pandemic. I couldn't exercise because my back hurt so the lack of exercise created weight gain. I am also a golfer and was not able to play the game I love. After this procedure, I am back playing golf, can exercise and am losing weight weekly. I can't say enough about the results or the care Dr. Schaja and his team provided. I highly recommend you consider PRP therapy with Dr. Schaja if it is an option for your pain.

Dr. Stein is a very nice physician and his staff is very accommodating. He explains everything he is going to do in a way that is very easily understood. He also explains everything he is doing while you undergo the procedure. He is thorough and very kind His staff is very friendly and prepared with any questions you might have concerning follow-up dates and treatment. It was a great experience under what could have been a trying and anxiety producing time.
